so actually never mind. I think what happened was I closed a portal and went to daemon right after without sleeping in a shelter first. It could just have been a random bug but it was most likely that i think

help I'm pretty sure i closed all portals. Daemon portals just don't close after you go through them and for some reason the outer rim ones aren't changing? like for some reason on the map it shows that they exist but if you go into the region map itself there's nothing there because I already went through all of them idk what to do im stuck

I think i'm stuck

I don't know what's happening and how to fix it

I got all the endings except for the final one and when i enter the phase where i can't control the warps and they happen automatically (after going to the daemon room with the 3 lit pillars)

I end up in an outdoor room with the rot prince but nothing happens, no dialogue, nothing, he doesn't speak, and therefore i can't progress further

He just stares at me

Am I getting it right that you want to do Prince ending BEFORE obtaining Weaver's powers bc otherwise it'll become blocked?

If so, I'm in dangerous position rn since I have only 1-2 W's locations left and I barely did anything with Prince bc I wanted to deliver all pearls to AU and find all unlocks before everuyhing is roted

If I complete the Prince and the Spinning Top ending first, will I be able to get the Weaver ending and the Choice ending?
